**HEATCRAFT REFRIGERATION PRODUCTS UPGRADES BOHN AND LARKIN
PRODUCTS TO BECOME 575-VOLT COMPATIBLE**

ATLANTA, March 17, 2003 — Heatcraft Refrigeration Products, manufacturer of premier, commercial refrigeration products for markets worldwide, announced that it will be offering a complete line of Bohn and Larkin products that meet the Canadian 575-volt requirements.

The new 575-volt Bohn and Larkin refrigeration products will include all medium and large unit coolers, horizontal and vertical air discharge condensing units, water cooled condensing units, remote indoor compressor units and air cooled condensers. These products are UL listed as 575-volt units and meet the Canadian market voltage needs.

“Our goal at Heatcraft has always been to meet the needs of our customers,” said Mark Westphal, Director of Sales and Marketing for Heatcraft Refrigeration Products. “With these upgrades, we are able to offer more refrigeration choices to our Canadian customers who require 575-volt compatible refrigeration products.”

Heatcraft Refrigeration Products LLC is a division of Heatcraft Worldwide Refrigeration Products, a wholly owned subsidiary of Lennox International, which manufactures premier, commercial refrigeration products. For more information, please contact Heatcraft Refrigeration Products LLC, 2175 West Park Place Blvd., Stone Mountain, Georgia, 30087 or visit Heatcraft’s Web site at www.heatcraftrpd.com.
